Forecast for Tuesday 13 Jul 2021

Weather: A cloudy start to the day with the odd patch of drizzle however western and southern hills will become drier and brighter through the morning with sunny spells developing. The Aberdeenshire Hills remain mostly cloudy through the afternoon but western and southern ranges look mostly dry with sunny spells.

Chance of cloud free mountain/hill tops above 800m: Little chance across the east and at first in the south and west, chances in the south and west improving to around 90% through the late morning and early afternoon.

Visibility: Periods or persistent cloud above 300-450m, with patches below in east, becoming in the south and west just small amounts below summit level in the afternoon. Away from cloud, visibility good falling to several kilometres in rain, becoming very good in the south and west with some decent panoramic views of surrounding hills and mountains.

Met Office Aberdeen Meteorologist's View
Risk of sunburn and dehydration in the strong sunlight across southern and western hills

Forecast for Wednesday 14 Jul 2021
Weather: Some clear spells across the west overnight but generally mostly cloudy with a few spots of rain. Soon after dawn becoming brighter from the west with sunny spells developing, with just the odd, mainly light, shower possible in the afternoon. Low cloud may edge back into eastern hills in the late evening.

Maximum wind: Northerly 10mph or less backing westerly around 10mph.

Chance of cloud free mountain/hill tops above 800m: Little chance at first improving to around 90% through the morning. Chances in the east likely to fall in the late evening.

Visibility: Periods or persistent cloud above 300-450m, with patches below in east, becoming just small amounts below summit level in the afternoon. Away from cloud visibility very good falling a little in any rain or showers.

Temperature: **Glens:** Around plus 9 or 10 Celsius rising to plus 22 Celsius by day
At 800m: Around plus 11 Celsius
Freezing level: Well above the summits
